# CONNECTN3

**Wireless digital satellite TV & Radio in the whole network**

- Enjoy digital satellite TV & radio wireless
- Digital satellite TV & radio in the whole network
- Wireless access point (WAP) for the existing network
- Microsoft windows media enter compatible
- Simple Installation

You have a satellite connection? You want to enjoy TV on your computer or on your laptop, but without cable connection? You cannot? You can with the CONNECT N3! It's simple, just connect the N3 with your satellite and your router and receive DVB-S on your computer. The CONNECT N3 makes wireless TV on computer and notebook possible. It sends the TV signals from the WiFi-Network to your computer. In that way, you are not tied up to a place and you can enjoy mobile satellite TV wherever you want in the whole house or even in your garden.

CONNECT N3 is equipped with a Draft-N Access point. Thereby you can connect to the internet wireless.

No additional TV software is necessary. The CONNECT N3 is windows media center compatible. Just install the driver and enjoy wireless digital satellite TV mobile in the whole house.
